

CHANNEL LETTERS

LED illuminated channel letters are a highly-effective way to present your name in lights. Custom crafted to your specific letter font and logo design, illuminated letters are the primary choice for building-mounted signage in retail environments. A local pioneer in this evolving industry—Akers Signs works alongside many retail developers in Northeast Ohio to design, produce, and install some of the area’s finest channel letter signage.

With frequent new developments in channel letter technology, there are many options available. Face lit and reverse channel letters, front and back lit channel letters, building or raceway mounted—Akers Signs will produce the perfect channel letter sign for your business or retail environment. Specializing in designing letter signage that meets your lease criteria, our team is an expert at efficient project management and development for this type of signage.
